

# Auto-Pharma

Video

# Airtight

AUTO-PHARMA® enhances clean room performance and contributes to maintain the air pressure levels inside the room.

- PVDF coated PVC curtain
- No-touch automatic opening sensor
- Reduced air flows both with positive and negative pressure

## Aseptic

To reduce the spread and transmission of bacteria and virus the opening commands for the AUTO-PHARMA® door are no-touch.

The user can open the door with a no-touch sensor. It will close automatically.

## Washability and cleanliness

Th AUTO-PHARMA® door frame is made in stainless steel, washable with aggressive detergents and corrosion resistant.

# Low air permeability

## Controlled Atmosphere

The AUTO-PHARMA® speed door reduce the ingress of contaminants and all those harmful suspended particles coming from the process inside the pharmaceutical, mechanical and electronic laboratories.

## Blu. more than a door

- Voice assistant
- Fast installation
- Easy setting
- Bluetooth connection
- Remote control
- Data reports
- Updates
- Easy to connect accessories
